EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald S. Liu (RG No: 64,170) on 09/9/2010.

The application has been amended as follows:

In the claims:

In claim 84 at line 2 before "computer readable" add "**non transitory**"

Reasons for allowance

The following is an examiner's statement of reasons for allowance:

Claims 1-34 are cancelled

Claims 35-84 are allowed.

Claims 35, 52, 77 and 79 the limitation of "... a method for generating an address value for addressing a memory which is an interleaver or deinterleaver memory, comprising the steps of: generating a plurality of address fragments; comparing only a fraction of the generated address fragments with a maximum allowable value; wherein generating a plurality of address fragments further comprises the step of generating a first address fragment for a first address value, and", is well known. However the prior art of record, specifically Agrawal et al ("US 6,314,534 B1"), taken either individually or

Art Unit: 2186

combination fails to teach or suggest the limitation of"... a second address fragment, which is consecutive of the first address fragment, for a second address value; and wherein the step of comparing only a fraction of the generated address fragments with a maximum allowable value further comprises the step of comparing only every other address fragment of the plurality of address fragments with the maximum allowable value, whereby the step of comparing comprises comparing the first address fragment with the maximum allowable value".

Claims 50 and 75 the limitation of"... a method for generating an address value for addressing a memory which is an interleaver or deinterleaver memory comprising the steps of: generating a plurality of address fragments by generating a first address fragment for a first address value and", is well known. However the prior art of record, specifically Agrawal et al ("US 6,314,534 B1"), taken either individually or combination fails to teach or suggest the limitation of" a second address fragment, which is consecutive of the first address fragment, for a second address value; and comparing only a fraction of the generated address fragments by comparing only every other address fragment of the plurality of address fragments with stored address fragments, which are known to be out of range when permuted and comparing the first address of fragment with the stored address fragments".

As to claim 84 the limitation of"... a software program product embodied on a computer readable medium executable by computer hardware when the product is executed by a processor contained in said computer hardware, the product having instructions comprising: generating an address value for addressing a memory which is

Art Unit: 2186

an interleaver or deinterleaver memory; generating a plurality of address fragments, and “, is well known. However the prior art of record, specifically Agrawal et al (“US 6,314,534 B1”), taken either individually or combination fails to teach or suggest the limitation of”... comparing only a fraction of the generated address fragments with a maximum allowable value; when generating a plurality of address fragments, generating a first address fragment for a first address value, and a second address fragment, which is consecutive of the first address fragment, for a second address value; and when comparing only a fraction of the generated address fragments with a maximum allowable value, comparing only every other address fragment of the plurality of address fragments with the maximum allowable value, whereby the step of comparing comprises comparing the first address fragment with the maximum allowable value”.

Examiner amendment for claim 84 has been done to overcome USC 101 issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
